☎ +91-8059982049

📍 Jind, Haryana, India

🚩 Indian

Summary

Software Engineer specializing in Web Development, Mobile App Development, ERP Systems, and SaaS Applications. Experienced in building scalable and user-friendly solutions using PHP, Laravel, MySQL, JavaScript, Flutter, REST APIs, and modern web technologies. Skilled in developing custom ERP platforms, CRM systems, business automation tools, and multi-tenant SaaS applications with a focus on performance, security, and seamless user experience. Passionate about transforming business requirements into efficient digital solutions and delivering high-quality software products.

Educational Qualifications

10th Class, Board Of School Education Haryana

04/2016 – 03/2017 | Jind, Haryana

Completed Secondary Education (10th Class) from Board of School Education Haryana with a strong academic foundation in Mathematics, Science, English, and Computer fundamentals.

12th Class, Board Of School Education Haryana

04/2018 – 03/2019 | Jind, Haryana, India

Completed Senior Secondary Education (12th Class) from Board of School Education Haryana, strengthening knowledge in core subjects while developing analytical, problem-solving, and communication skills.

Professional Experience

Full Stack Developer, Mineib Creative Technology

01/2026 – Present | Faridabad, Haryana, India

Roles & Responsibilities

- Leading the end-to-end design, development, deployment, and maintenance of enterprise-grade SaaS platforms, ERP solutions, CRM systems, and custom business applications.
- Architecting scalable full-stack applications using Laravel, Node.js, React.js, Angular, Flutter, and modern cloud technologies.
- Developing multi-tenant SaaS products with subscription management, role-based access control, billing systems, and API integrations.
- Building responsive web portals, mobile applications, and customer-facing digital platforms with a focus on performance, security, and user experience.
- Designing and optimizing database architectures using MySQL, MongoDB, Redis, and Vector Databases for AI-powered applications.
- Implementing AI and automation solutions including intelligent search, document processing, chatbot integrations, and workflow automation.
- Managing cloud infrastructure and deployments on AWS, including EC2, S3, RDS, CloudFront, Load Balancers, and monitoring services.
- Developing microservices and event-driven architectures using Apache Kafka for real-time communication and data processing.
- Integrating third-party services such as payment gateways, SMS providers, email platforms, CRM systems, and external APIs.
- Establishing CI/CD pipelines, DevOps workflows, containerized deployments, and security best practices across projects.
- Collaborating with clients, stakeholders, designers, and development teams to transform business requirements into scalable technology solutions.
- Mentoring junior developers and enforcing coding standards, system architecture guidelines, and software development best practices.

Full Stack Developer, Tech Saints International Pvt. Ltd.

01/2025 – 07/2025 | Delhi, India

Roles & Responsibilities

- Designed, developed, and maintained scalable web and mobile applications using **Laravel, Node.js, React.js, Angular, and Flutter**.

Bachelor's Of Computer Applications (BCA),

Indhira Gandhi National Open University

07/2022 – 12/2026 | Kaithal, Haryana, India

Pursuing a Bachelor's of Computer Applications (BCA) from Indira Gandhi National Open University (IGNOU), with a focus on software development, programming, database management, web technologies, and computer applications.

Master's of Computer Applications,

Indhira Gandhi National Open University

07/2025 – 12/2026 | Kaithal Haryana, India

Pursuing a Master of Computer Applications (MCA) from Indira Gandhi National Open University (IGNOU), focusing on advanced software development, system design, database management, cloud technologies, and modern application architecture.

Languages

Skills

- Built and optimized RESTful APIs and microservices architecture to support high-performance enterprise applications.
- Developed responsive and interactive frontend interfaces using **React.js, Angular, TypeScript, HTML5, CSS3, and Bootstrap**.
- Created cross-platform mobile applications with **Flutter**, ensuring seamless user experience across Android and iOS devices.
- Designed and managed relational and NoSQL databases including **MySQL** and **MongoDB**, focusing on performance optimization and data integrity.
- Implemented authentication, authorization, role-based access control (RBAC), and API security best practices.
- Worked with **AWS Cloud Services** for application deployment, hosting, storage, monitoring, and infrastructure management.
- Integrated **Apache Kafka** for real-time event streaming, message processing, and asynchronous communication between services.
- Built AI-ready applications utilizing **Vector Databases** for semantic search, document retrieval, and intelligent recommendation systems.
- Developed and consumed third-party APIs, payment gateways, CRM integrations, and cloud-based services.
- Participated in complete SDLC activities including requirement gathering, system design, development, testing, deployment, and production support.
- Implemented CI/CD pipelines, Git-based version control workflows, and automated deployment strategies.
- Collaborated with designers, product managers, and business stakeholders to deliver scalable and maintainable software solutions.

Junior Software Engineer,

JBDS Power Project International Pvt. Ltd.

05/2019 – 09/2024 | Bilaspur, Haryana, India

Role & Responsibilities:

- Designed, developed, and maintained enterprise-level web applications, ERP solutions, and corporate websites using modern web technologies.
- Played a key role in the development and enhancement of ERP modules including Human Resources (HR), Inventory Management, Sales, Purchase, Accounts, and Customer Management.
- Developed and maintained the official website and digital platforms for JBDS Power Project International Pvt. Ltd., ensuring performance, security, and responsive design.

Best Projects

Signature Global [🔗](#)

Developed and maintained the official real estate website for Signature Global as part of the development team at Tech Saints International Pvt. Ltd. Built responsive user interfaces, integrated lead generation modules, optimized website performance, and implemented SEO-friendly architecture to enhance user engagement and digital presence. Collaborated with designers and stakeholders to deliver a seamless property browsing experience across desktop and mobile platforms.

Specops [🔗](#)

Developed and enhanced the SpecOps e-commerce platform, implementing product management, shopping cart, checkout, payment integration, order processing, and responsive user experiences while optimizing performance and scalability.

Choose a taxi [🔗](#)

Developed and enhanced the Choose A Taxi booking platform include website [🔗](#) & mobile application, implementing ride booking workflows, driver management, trip scheduling, payment integration, and location-based services while ensuring performance, security, and scalability.

Jbds Power ERP System With HRM & Biometric [🔗](#)

Developed an enterprise ERP platform for JBDS Power Project International Pvt. Ltd. with integrated HRM, payroll, attendance tracking, biometric synchronization, leave management, and employee lifecycle management modules.

Melooaha AI Astrologer [🔗](#)

Developed an AI-powered astrology platform that provides personalized horoscope predictions, birth chart analysis, AI-driven consultations, and intelligent recommendation systems through scalable web technologies.

- Collaborated with cross-functional teams to gather business requirements and convert them into scalable software solutions.
- Built dynamic dashboards, reporting systems, and workflow automation features to improve operational efficiency.
- Integrated third-party APIs, payment gateways, email services, and external business systems.
- Optimized application performance, database queries, and overall system architecture for better scalability and reliability.
- Performed software testing, debugging, deployment, and ongoing maintenance of business-critical applications.
- Worked with PHP, Laravel, MySQL, JavaScript, HTML, CSS, Bootstrap, and related technologies to deliver high-quality solutions.
- Participated in the complete Software Development Life Cycle (SDLC), from requirement analysis to deployment and support.
